Summary

I am an enthusiastic developer with knowledge of both frontend and backend development, passionate about turning ideas into practical digital products. I focus on writing clean code, optimizing performance, and creating thoughtful user experiences.

I am currently completing my third year of university and have finished all required coursework, allowing me to work full-time. I am seeking an internship opportunity where I can apply my skills, gain hands-on experience, and grow in a professional environment. I look forward to collaborating with a team, contributing to meaningful projects, and pursuing my passion for software development.

Projects

Travel Booking and Smart Tour Recommendation Platform  Website |  GitHub

Developed a travel booking platform featuring multi-criteria tour search, cart and reservation management, ZaloPay/VNPay payments, and a role-based admin dashboard. Currently extending the Node.js/MongoDB backend with a hybrid recommendation system combining Content-Based and Collaborative Filtering, ALS/SVD matrix factorization, and TensorFlow.js for real-time personalized tour ranking.

AI Copywriting Platform with Fine-Tuning and Plagiarism Detection  Website |  GitHub

Built a full-stack AI copywriting SaaS that generates industry- and tone-specific marketing content using Gemini, Vertex AI, and Llama/Groq. Implemented content, project, and template management, hybrid plagiarism detection, Vertex AI fine-tuning for custom brand voices, subscription billing with VNPay/ZaloPay/VietQR, and role-based administration using Next.js, TypeScript, Express.js, and MongoDB.
